Summary

Senior Frontend Engineer / Frontend Lead with 10+ years of experience building React, Next.js and TypeScript applications, CMS-driven websites, public web platforms, internal tools and frontend-heavy products. Strong background in frontend architecture, reusable component systems, localization, performance optimization, map-based interfaces, PWA, GraphQL APIs and CMS integrations with Sanity, Directus and Strapi.

Experienced in code review, technical leadership, cross-functional collaboration and end-to-end delivery, including frontend implementation, CMS modeling, Docker/Linux deployments, CI/CD, production maintenance and automation tooling.

Technical Skills

Frontend: React, Next.js, TypeScript, JavaScript, Redux, HTML5, CSS3, styled-components, Gatsby, Nuxt

Architecture & APIs: GraphQL, REST, WebSocket, WebRTC, PeerJS, Next.js API routes

CMS & Content: Sanity, GROQ, Directus, Strapi

Maps & Geospatial UI: MapLibre GL, Leaflet, interactive map interfaces

Infrastructure & Automation: Docker, Linux, Nginx, CI/CD, Git, Node.js automation, configuration generation, Telegram Bot API

Performance & UX: PWA, SEO, metadata optimization, image/video optimization, responsive UI

Design & Tools: Figma, SVG, web design, component-driven UI

Developer Tools: Git, Docker, Linux, OpenCode, Codex, AI-assisted development workflows

Experience

Ecoparsec NGO — Technical Lead / Senior Frontend Engineer

Remote • July 2022 – Present

Stack: Next.js, TypeScript, GraphQL, Directus, Strapi, Docker, Linux, Nginx, PWA, MapLibre GL

- Lead development of a public ecological web platform for Armenia, including an interactive recycling map, eco wiki and CMS-managed content.
- Own end-to-end technical delivery across frontend, CMS, deployment, infrastructure, UI design and production support.
- Built the frontend architecture with Next.js, TypeScript and GraphQL, including map UI, content pages and PWA functionality.
- Selected, configured and maintained backend/CMS infrastructure using Strapi and Directus.
- Set up Docker, Nginx and CI/CD workflows for deployment and maintenance.
- Designed and implemented product UI without a dedicated designer, using Figma and reusable visual patterns.
- Integrated the ecological map into the Yerevan municipal “Greening and Environmental Protection” website.

Quintegro — Frontend Developer

Remote • April 2023 – October 2025

Stack: Next.js, React, TypeScript, Sanity, GROQ

- Developed and maintained a CMS-driven Next.js/React website integrated with Sanity.
- Built reusable frontend components and improved existing UI flows across localized pages.
- Fixed production bugs, reviewed pull requests and contributed to frontend code quality.
- Integrated content models and frontend data fetching through GROQ and Next.js APIs.
- Collaborated with a cross-functional remote team in an agile delivery process.

WayRay — Frontend Team Lead

Moscow / Remote • April 2021 – April 2023

Stack: Next.js, React, TypeScript, GraphQL, Gatsby, Strapi, Docker

- Led an outsourced frontend team delivering company websites and internal web applications.
- Rebuilt the corporate website and migrated content management to Strapi CMS.
- Improved frontend performance, animation behavior, image optimization and video processing during build.
- Built internal tools, including employee CMS workflows and office security-related services.
- Refactored legacy frontend modules and improved maintainability of existing projects.
- Reviewed code, coordinated delivery with stakeholders and supported frontend architecture decisions.

Freelance — Frontend Developer

Remote • August 2020 – February 2021

Stack: React, Gatsby, TypeScript, GraphQL, Strapi, Node.js, styled-components, Figma

- Designed and developed websites from scratch using Gatsby, React, TypeScript and Strapi.
- Created UI layouts in Figma and implemented responsive frontend interfaces.
- Configured basic infrastructure, including Nginx, webhooks and virtual machine setup.
- Optimized metadata, images and videos for SEO and performance.
- Delivered full-cycle frontend work from design to deployment support.

Xometry Europe / Shift GmbH — Frontend Developer

Remote • October 2019 – July 2020

Stack: React, Redux, TypeScript, styled-components, WordPress

- Maintained and developed frontend applications for CRM, partner area and customer-facing panels.
- Refactored legacy React projects and migrated parts of the codebase to TypeScript.
- Created new UI features and redesigned existing user flows.
- Contributed to an internal UI library and reusable frontend patterns.
- Worked with multiple frontend projects in a remote product environment.

Optimax Investments Ltd. — Frontend Developer

Tolyatti • July 2018 – July 2019

Stack: React, Redux, Flow, Jest, redux-saga

- Built new frontend features and fixed production bugs in a Scrum/Agile team.
- Optimized website loading by reducing the number of backend requests.
- Participated in code reviews and frontend architecture discussions.
- Worked with React, Redux, Flow, Jest and redux-saga in a production codebase.
- Gained strong teamwork experience in a structured engineering environment.

Earlier Experience — Frontend Developer / Web Developer

Remote / Samara • August 2014 – June 2018

Stack: Vue, Vuex, WebRTC, WebSocket, PHP, HTML, CSS, JavaScript

- Built CRM systems, websites and real-time communication features using Vue, WebRTC and WebSocket.
 - Developed and maintained commercial websites and client-facing web projects.
 - Led a small web development department and participated in client negotiations.
 - Combined frontend development, web design and delivery management in client-facing projects.
-

Selected Projects

ecomap.am / yrvn.am — Public Ecological Map Platform

Public web platform for ecological data, recycling points and educational content in Armenia.

- Built and maintained the frontend, CMS structure, map interface and deployment setup.
 - Implemented CMS-driven content, localization, PWA behavior and map-based UI.
 - Worked on the product as a technical lead, frontend developer and UI designer.
 - Stack: Next.js, TypeScript, GraphQL, Directus, Strapi, Docker, MapLibre GL.
-

Private Network Automation Platform

Private multi-server proxy/VPN configuration platform used by a small group of trusted users.

- Built a Node.js-based generator for structured JSON configurations with automated routing rules, balancing logic and server-specific output.

- Maintained several Linux servers and automated client configuration updates across multiple endpoints.
 - Implemented a Telegram bot for user-facing management and operational workflows.
 - Designed the setup to reduce manual maintenance and make configuration changes safer, repeatable and easier to distribute.
 - Stack: Node.js, JSON configuration generation, Linux, Docker, Telegram Bot API, proxy/VPN infrastructure.
-

decloud.cc — “Scan and Share” PWA

PWA for quick device-to-device sharing.

- Built a web application for fast sharing between devices.
 - Implemented PWA-oriented behavior and browser-based communication flows.
 - Stack: React, Next.js, PWA, WebRTC, WebSocket.
-
